

Group financial review – our “performance”

Capital investment in our networks reached £4.1 billion in 2024/25, driven by the infra-structure programme in the UK and the “Climate Leadership” Act in New York. Our net-work reliability was 99.99% across all regions.

Our efficient financial workflow improved the official net debt position; the final dividend was 31.36 pence per share (2023/24: 30.82 pence).

Underlying operating profit — adjusted for timing — increased by 6% to £6,689 million, whilst the Group’s ‘core’ earnings per share rose.

Cash generated from continuing operations was £6,991 million in 2024/25, down 4% from £7,281 million, primarily due to the timing of working capital movements and lower receipts from our regulated businesses in the year.

Net debt at the end of the year was £41,371 million (2023/24: £43,607 million). Interest paid of (1,588) million is shown net of capital interest and includes hedging.

shareholder approval at the AGM, will be paid on 12 September 2025 to holders on the register.

The Board has recommended a final dividend of 31.36 pence per share, which, subject to

Summary cash flow statement

The Group's cash generated from operations remained resilient despite macro-economic headwinds and higher interest rates throughout the reporting period.

Net debt reconciliation shows that the net cash outflow (continuing) of £(6,885) million was partly offset by disposals of £1,263 million.

£m	2024/25	2023/24	Change
Cash generated from continuing operations	6,991	7,281	(4%)
Net interest paid	(1,588)	(1,479)	(7%)
Net tax paid	(183)	(342)	46%
Dividends paid	(1,529)	(1,718)	11%
Net cash outflow (continuing)	(6,885)	(61%)	n/m
Net debt at end of year	(41,371)	(43,607)	5%

1. Disposals of £(143) million were excluded from the cash flow, see note 29.
2. Interest paid includes £(1,588) million of the FY25 charge.

Operating profit before exceptional items rose by 12% to £2,946 million, supported by strong performance in the UK Electricity Transmission segment and favourable foreign exchange movements.

Capital expenditure was £8.3 billion (2023/24: £7.8 billion) as we continued to invest in energy network reinforcement.
